

RIYAS A C

Senior Backend Developer | Python | Django | REST APIs | PostgreSQL

Kerala, India | +91 6282243132 | riyasac25@gmail.com | linkedin.com/in/riyasac | riyasac.github.io

PROFESSIONAL SUMMARY

Senior Backend Developer with 7+ years of experience building scalable web applications and REST APIs with Python, Django, and Django REST Framework. Delivered 20+ production projects across POS and inventory, e-commerce, payments, LMS, and enterprise platforms. Specializes in backend architecture, scalable system design, PostgreSQL database design and query optimization, Redis caching, asynchronous processing with Celery, secure authentication (JWT, SSO), webhook-based payment gateway integration, AWS S3, and Docker-based deployment. Optimized rank calculations for 250,000+ users, improving scalability by 75%. Works closely with front-end, design, and business stakeholders from requirement gathering through production support.

TECHNICAL SKILLS

- **Languages:** Python, Golang, JavaScript, HTML, CSS
- **Frameworks:** Django, Django REST Framework (DRF), FastAPI, Gin
- **Databases:** PostgreSQL, MySQL, SQLite, Django ORM, Database Design, Indexing, Query Optimization, Performance Optimization
- **Backend & APIs:** REST APIs, API Design, Backend Architecture, Scalable System Design, WebSockets, Webhooks, Swagger/OpenAPI, Third-Party API Integration
- **Security:** Authentication & Authorization, JWT, SSO, Secure Handling of Payment Data
- **Async & Caching:** Redis Caching, Celery, RabbitMQ, Background Jobs, Scheduled Tasks
- **Cloud & DevOps:** AWS S3, Docker, Gunicorn, Containerized Deployment
- **Testing & Quality:** Pytest, Unit Testing, Debugging, Production Troubleshooting, Code Review, Refactoring
- **Tools & Practices:** Git, Bitbucket, JIRA, Postman, Agile, Requirement Gathering, Cross-Functional Collaboration
- **AI-Assisted Development:** Claude Code, GitHub Copilot, OpenAI Codex, Gemini
- **Currently Learning:** React.js, React Native with Expo (mobile apps)
- **Next Learning Goals:** AWS, CI/CD Pipelines with Jenkins, Kubernetes, Nginx

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Codelynks Software Solutions Pvt. Ltd. | Kochi, India | May 2025 - Present

POS & Multi-Store Inventory Platform

- Developed a scalable multi-store POS and inventory platform using Django, DRF, and PostgreSQL, covering billing, inventory, payments, returns, purchasing, vendors, discounts, and reporting.
- Designed, debugged, and optimized REST APIs, database queries, indexes, and transactional stock workflows with batch and expiry tracking for high-volume operations.
- Implemented asynchronous workflows with Celery and Redis for bulk data migration, notifications, expiry alerts, and scheduled business operations.

- Wrote Pytest unit tests for core POS modules, reducing bugs and errors by about 60%.
- Containerized and deployed backend services with Docker and Gunicorn, secured with JWT authentication, and maintained Swagger/OpenAPI documentation for front-end and QA teams.
- Collaborated with front-end, design, and QA teams and business stakeholders to gather requirements, and diagnosed and resolved critical production issues.

Employee & Project Management Platform

- Developed an internal employee and project management platform using Django, DRF, WebSockets, PostgreSQL, and Docker, with real-time updates for project and resource tracking.
- Implemented organization-based access control and modules for project allocation, resource management, utilization tracking, certifications, upskilling, and feedback.

Senior Software Engineer

Epixel Solutions Pvt. Ltd. | Palakkad, India | July 2019 - April 2025

- Optimized rank calculation systems for 250,000+ users using in-memory processing, improving overall system scalability by 75%.
- Built Golang backend services for rank and bonus calculations on the e-commerce platform, running compensation processing as dedicated background services.
- Engineered bulk CSV import/export and data migration pipelines with Django, Celery, ZIP processing, and background jobs, reducing processing time by 30%.
- Developed core financial systems, including Binary, Level, Global Pool, and Rainmaker compensation plans, multi-wallet transactions, withdrawals, and financial reporting on sensitive financial data; integrated Razorpay, Hubtel, CoinPayments, and Cash on Delivery with webhook-based payment confirmation, increasing transaction completion by 15%.
- Designed and integrated REST APIs for user registration, order management, user migration, SSO, mobile applications, and third-party platforms such as GoHighLevel.
- Built referral, gift voucher, onboarding, and notification workflows supporting 5,000+ users, and an LMS for agent onboarding and training.
- Containerized and standardized deployments with Docker, reducing deployment time by 50%, and applied legacy code refactoring, unit testing, and code review practices that contributed to a 30% reduction in bugs.

EDUCATION

Diploma in Computer Engineering

AKNM Government Polytechnic College, Thirurangadi | July 2016 - July 2019

First Class with Distinction | CGPA 9.22/10

Higher Secondary Education (Science)

GHSS Othukkungal | June 2014 - March 2016 | 85.83%

SSLC (Secondary School Education)

GHSS Othukkungal | March 2014 | 96%

AWARDS

Outstanding Performer of the Month | Epixel Solutions Pvt. Ltd. | July 2022
